Official Brand Registry & Technical Sanitization Record for KOTHA'S ATELIER ARCHITECTS

PRODUCTION READY

> **Status:** Technical restructuring, legal font migration (Plus Jakarta Sans), real Contact API handler (`POST /api/contact`), and official brand metadata application have been **100% completed**.

1 Registered Brand Identity & Domain Configuration

Official credentials applied across page titles, hero sliders, canonical tags, OpenGraph metadata, and JSON-LD structured schemas.

Brand / Studio Name	KOTHA'S ATELIER ARCHITECTS
Official Tagline	**Where Context Shapes Experience**
Brand Subtitle	We believe architecture should not merely occupy a site; it should belong to it.
Production Domain	https://kothasatelier.com
Public Inquiries Email	kothasatelier@gmail.com
Phone & WhatsApp	+91 96039 98377
Office Physical Address	Shivarampally, Rajendranagar, Hyderabad, Telangana, India — 500052
Social Media Profiles	Instagram: https://www.instagram.com/kothas_atelier/ YouTube: https://youtube.com/@kothaprudvirajreddy1011

2 Completed Technical Sanitization & API Architecture

All backend and frontend structural milestones executed with zero functional regression.

- ✅ **Directory Restructuring (`minaleandmann.com/` ➔ `public/`)** Completed
  Moved scraped domain folder to standard `public/`. Updated `server.js`, `vercel.json` rewrites, and `sync_projects.py`.
- ✅ **HTTrack Comment & Watermark Stripping** Completed
  Stripped all 269 HTTrack mirror comments (``, ``) across all HTML pages.
- ✅ **Legal Typography Migration (Plus Jakarta Sans)** Completed
  Deleted proprietary Commercial Type `Graphik` font binaries and removed Adobe Typekit script. Transitioned entire site to 100% legal Google Font **Plus Jakarta Sans** (both locally hosted and CDN-loaded).
- ✅ **Real Contact API Handler (`POST /api/contact`)** Completed
  Replaced dummy `/wp-json/` stub with dedicated `POST /api/contact` handler in `server.js` and serverless `api/contact.js`. Saves inquiries persistently to `submissions/contacts.json` and `contacts.log`.
- ✅ **Purged Scraper Junk Files** Completed
  Deleted 22 `_tel_*.html` files, 21 `_mailto_*` directories, 20 WordPress shortlink redirect files, and `cdn-cgi`/`wp-admin` dumps.
- ✅ **External CDN Directory De-Mirroring** Completed
  Deleted local domain folders (`cdnjs.cloudflare.com/`, `use.typekit.net/`, etc.). Converted all asset links to official HTTPS CDN URLs.
- ✅ **SEO, Canonical & Structured Schema Overhaul** Completed
  Updated canonical URLs to `https://kothasatelier.com/`, injected YouTube & Instagram icons, and populated Hyderabad studio schemas.
- ✅ **Local Server Verification (`server.js`)** Completed
  Tested all endpoints (`/`, `/about/`, `/contact/`, `/residential-portfolio/`, CSS/JS bundles) returning HTTP 200 OK without errors.

Website Transformation & Launch Specification

Part 2: Visual Media & Portfolio Replacement Guide

CLIENT ACTION ITEMS

3 Media & Portfolio Asset Replacement (Your Final Checklist)

As agreed, you will replace the visual media and project descriptions before public domain launch.

- [ ] **Hero Architectural Showcase Video & Poster** High Copyright Priority
  Replace `preview_house_video.mp4` and `preview_house_poster.jpg` with your own project footage or licensed architectural video.
- [ ] **Favicons & Studio Crest Icons**
  Replace `favicon.ico`, `favicon.svg`, `favicon-16x16.png`, `favicon-32x32.png`, and `apple-touch-icon.png` in root & `public/`.
- [ ] **Residential & Commercial Portfolio Photography** High Copyright Priority
  Replace project photos located in `public/wp-content/uploads/` with your studio's original project photography. Clear EXIF metadata.
- [ ] **Project Titles & Descriptions (`residential-portfolio/index.html`)**
  Edit your project names in `residential-portfolio/index.html` and run `python sync_projects.py` to propagate them everywhere.
- [ ] **Privacy Policy (`public/privacy-policy/index.html`)**
  Replace template text with your own privacy policy tailored to Indian IT Act / GDPR compliance.
